be significant property damage.
---------------------------------

Alert Statements in this Sheet

#### / WARNING

Danger of damage to eyes The ZFV-SC50 emits visible light.

Do not stare into LED light directly. If the object causes regular reflections, take care not to let the reflected light enter your eyes.

### **PRECAUTIONS FOR SAFE USE**

Please observe the following precautions for safe use of the products

- (1) Installation Environment
- Do not use the product in environments where it can be exposed to inflammable / explosive gas. To secure the safety of operation and maintenance, do not install the product close
- to high-voltage devices and power devices. During installation, make sure that screws are tightened firmly.
- (2) Power Supply and Wiring
- High-voltage lines and power lines must be wired separately from this product. Wiring them together or placing them in the same duct may cause induction, resulting in malfunction or damage.
- (3) Others
  - Do not attempt to dismantle, repair, or modify the product.
    Dispose of this product as industrial waste.

# PRECAUTIONS FOR CORRECT USE

Please observe the following precautions to prevent failure to operate, malfunctions, or undesirable effects on product performance. (1) Installation Site

Do not install the product in locations subjected to the following conditions:

- Ambient temperature outside the rating
- Rapid temperature fluctuations (causing condensation) Relative humidity outside the range of 35 to 85%
- Presence of corrosive or flammable ga Presence of dust, salt, or iron particles gases
- Direct vibration or shock

- · Reflection of intense light (such as other laser beams, electric arc welding machines
- or ultraviolet rays)
- Direct sunlight or near heaters Water, oil, or chemical fumes or spray Strong magnetic or electric field
- (2) Power Supply and Wiring
- Before connecting/disconnecting the Sensor Head, make sure that the Smart Sensor is turned OFF. The Smart Sensor may break down if the Sensor Head is connected or
- disconnected while the power is ON. Use only combinations of Sensor Heads and Sensor Controllers specified in this sheet. (3) Optical Axis and Detection Range
- The center of the optical axis sometimes differs according to each Sensor Head. During installation, be sure to check the center of the image and the detection range on the LCD monitor of the Amplifier Unit.
- (4) Ventilation Film
- Do not peel off or probe the ventilation film with a sharp-pointed object. If you so, the specifications of the protective structure may no longer be satisfied. Do not block the ventilation film. Doing so might cause the front panel to be con-densed.
- (5) Focus Adjustment Control
- Do not exert the torque of 5N·m or more as this might damage the control. (6) Extra Light Connector
- When you do not use extra light, put the connector cap on the connector. Water-proof can not be assured without the cap.
- (7) Maintenance and Inspection
  - Do not use thinner, benzene, acetone or kerosene to clean the Sensor Head and Amplifier Unit. If large dust particles adhere to the front Panel of the Sensor Head, use a blower
  - If alge dust particles adhere to the nontraner of the School read, use a blowe brush (used to clean camera lenses) to blow them off. Do not blow off the dust particles with your mouth.
    To remove smaller dust particles, wipe gently with a soft cloth.
    Do not use excessive force to wipe off dust particles. Scratches on the front Dorot with the soft cloth.
  - Panel may cause errors.

#### ■Safety of LED

The product is considered to be classified as Risk Group 1 by IEC62471.

- (4) Sensor Head mounting fixture This fixture is for mounting the Sensor Head. This fixture can be mounted on all of the four This section captures the mounting surfaces.
  - (5) Focus adjustment control This control is used for adjusting the focus of the image.
  - (6) Ventilation film This film prevents the front panel from condensation.

Mounting fixture

(7) Extra Light Connector This connector is connected to the Extra Light.

Attach the ferrite core (provided with the Smart Sensor) to the case side and the connector side of the Sensor Head.

### Installing the mounting fixture

Attach the mounting fixture (provided with the Smart Sensor) to the side of the Sensor Head. The mounting fixture can be installed on all of the four mounting surfaces.

#### ZEV-SC50/SC50W

- (1) Align the two hooks on one side of the mounting fixture with the two grooves on the Sensor Head body (light emitting side).
- (2) Press in the other hook. Push down until you hear it snap into place.
- (3) Make sure that the mounting fixture is firmly fixed on the Sensor Head.

#### · ZFV-SC50R

- (1) Align the boss of the base part(Black) and groove of the Sensor Head body.
- (2) Attach the bracket(Silver) to the base part.
- (3) Fasten the screw(attached) and fix the parts.
- Recommended torque value : 0.54 N·m

# Removal procedure

Insert a regular screwdriver into the gap (one of the two gaps) between the mounting fixture and the Sensor Head case, and remove the mounting fixture.

#### Installation distance

The following graphs show the relationship between detection range and setting distance for each model of Sensor Head. Values differ according to each model of Sensor Head, so fully check the model before using these graphs.

### Installation procedure

(1) Install the Sensor Head at the installation distance obtained in the above graphs.

(2) Turn the focus adjustment control to the left and right to adjust the focus.

Detection range H

Before turning the focus adjustment control slightly to the left and right, make sure that <u>`</u>@ the guide light is not at the upper or lower limit positions. The focus adjustment control is a multi-turn control. However, the control stops turning at the upper or lower limit CHECK positions. Do not exert unnecessary force to turn the control at the upper or lower limit sitions as this might damage the control.
